G.R.A.S.
SOUND & VIBRATION

New features - but still the same

Improved materials

KEMAR's previous fiber glass construction has been updated to a composite plastic construction that is more rugged and user friendly.

Snap fit ear simulators

Mount and dismantle the ear simulators with one hand for ear-canal exchange or calibration.

More mounting options

KEMAR is delivered with two tripod adapters; one for a tripod with 3/8" thread and one for a Ø35 mm loudspeaker stand.

Convenient connections

The internal cable connections have been moved to the neck for greater accessibility.

1-Click access

The scalp is easily removed with the new release button which provides easy access to the inside of KEMAR.

KEMAR for your needs

KEMAR is available in several application specific configurations: assembled, calibrated and delivered as a complete out-of-the-box system for immediate use.
